DETAILED ACTION

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Priority

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Rejections - 35 USC § 102

Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Robineau (US 6,195,910). Robineau is considered to disclose the claimed invention comprising:

- a base **24** forming a floor of a body;
- a front cabinet **18** forming a front portion of the body;
- a side cabinet **26** forming a side portion of the body;
- a back cover **20** forming a back portion of the body;
- a control panel **28** having a hook (please see column 10 lines 12-15 for the express teaching of the panel having a hook);

- a top cover **22** forming a top of the body wherein the top cover has a predetermined curvature, and wherein the control panel is provided on a rear portion of the top cover, the top cover comprising a groove provided at rear portion of the top cover wherein the hook is disposed in a surface of the control panel opposite the top cover such that the hook inserts into the groove (please see column 10 lines 12-15 again wherein the disclosed loop is considered to

Art Unit: 3749

inherently anticipate the claimed groove because both a loop and a groove are used to dispose a hook in a control panel surface opposite a top cover); and

a fire wall **34** made of metal, and provided at a lower portion of the top cover (wherein the firewall definition is reasonably construed under the broadest meaning consistent with the specification since the non-patent literature cited in this action shows that is well known the metal back of dryers act as firewalls, thereby inherently anticipating the claimed invention). Robineau is also considered to disclose the firewall having the same predetermined curvature because the figures show that the firewall and groove have a predetermined curvature which is the same.

Claims 4-6 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Gerhardt (US 2,966,051).

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Art Unit: 3749

Claims 1-6 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 15-25 of copending Application No. 10/629,775. Although the conflicting claims are not identical, they are not patentably distinct from each other because the presently claimed firewall is considered to be an obvious variation to the copending claimed fire plate.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Response to Arguments

Applicant's arguments with respect to claims 1-3 have been considered but are moot in view of the new grounds of rejection.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. References C-G and U-W, cited in this application, are considered to disclose features capable of obviating the claimed invention.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory

Art Unit: 3749

period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
